Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Objections

1. The claims are objected to because they include reference characters, which are not enclosed within parentheses.

Reference characters corresponding to elements recited in the detailed description of the drawings and used in conjunction with the recitation of the same element or group of elements in the claims should be enclosed within parentheses so as to avoid confusion with other numbers or characters which may appear in the claims. See MPEP § 608.01(m).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 11, 15-17 and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by St. Amand (3,370,158).

St. Amand discloses a canister (16) for capturing and storing fuel vapors from a device, comprising: a housing (40), and one of a plurality of cartridges (70,72) sealably assembled therein, wherein the one of the plurality of cartridges is operable to capture and store at least a portion of the fuel vapors from the device, and is selected based upon a measure of the fuel vapors from the device generated during predetermined

conditions. With regard to selectability, extremely fine particles may be used to thereby increase the adsorbing capacity, see col. 3 and ll. 18-22.

With regard to claim 11, each one of the plurality of cartridges is interchangeable in the housing, see abstract.

With regard to claim 15, wherein the device comprises a motorized vehicle.

With regard to claim 16, wherein the device comprises a hand-held device including an internal combustion engine.

With regard to claim, 17, wherein the device comprises a stationary internal combustion engine with a fuel source.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 2-10, 12-14, 18,20 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over St. Amand (3,730,158).

St. Amand discloses all the limitations as applied to claims 1, 11, 15-17 and 19 above except for the relative positions of the internal components.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the invention of St. Amand by rearranging or reversing location of parts, since it has been held that a mere reversal of essential working parts of a device involves only routine skill in the art, In re Einstein, 8 USPQ 167.

The motivation to do so would have been to prevent discharge of fuel vapor to the environment.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references show canisters with interchangeable cartridges.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mahmoud Gimie whose telephone number is 571-272-4841. The examiner can normally be reached on Tuesday-Friday between 7 a.m. -3:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Henry Yuen can be reached on 571-272-4856. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
